Osteoporosis is a disease in which bone weakening increases the risk of a broken bone. It is the most common reason for a broken bone among the elderly. Bones that commonly break include the vertebrae in the spine, the bones of the forearm, and the hip. Until a broken bone occurs there are typically no symptoms. Bones may weaken to such a degree that a break may occur with minor stress or ...

Zelp. In 1834, Joseph Smith and members of the Zion's Camp march stumbled onto some bones in southern Illinois. According to the journals of several other church leaders who were present at the time, Smith received a revelation about the buried remains telling him that they were from a mighty Lamanite warrior named Zelp who was described as a "white Lamanite" allied with the Nephites.
